kohut s twinship across cultures the psychology of being human chronicles a 10 year voyage in which the authors struggled initially independently to make sense of kohut s intentions when he radically re defined the twinship experience to one of being human among other human beings commencing with an exploration of kohut s work on twinship and an illustration of the value of what he left for elaboration togashi and kottler proceed to introduce a new and very different sensitivity to understanding particular psychoanalytic relational processes and ideas about human existential anguish trauma and the meaning of life together they tackle the twinship concept which has often been misunderstood and about which little has been written uniquely the book expands and elaborates upon kohut s final definition being human among other human beings it problematizes this apparently simple concept with a wide range of clinical material demonstrating the complexity of the statement and the intricacies involved in recognizing and working with traumatized patients who have never experienced this feeling it asks how a sense of being human as opposed to being described as human can be generated and how this might help clinicians to better understand and work with trauma written for psychoanalysts and psychoanalytic psychotherapists interested in self psychological intersubjective and relational theories twinship across cultures will also be invaluable to clinicians working in the broader areas of psychoanalysis psychotherapy social work psychiatry and education it will enrich their sensitivity and capacity to understand and treat traumatized patients and the alienation they feel among other human beings

in this groundbreaking cultural history of psychotherapy historian and psychologist philip cushman shows how the development of modern psychotherapy is inextricably intertwined with that of the united states and how it has fundamentally changed the way americans view events and themselves using an interpretive historical approach cushman shows how and why psychotherapy

was created what its functions are and how it has come to play such an enormous role in american life asserting that each era develops a different conception of what it means to be human cushman traces the evolution of the self throughout history to contemporary times naming its current configuration in our consumerist society the empty self one that needs constant filling in constructing the self constructing america he places psychotherapy in its social and historical context and examines its origins in the nineteenth century to its preeminence in american life today arguing that its establishment as a social institution may in fact reproduce some of the very ills that it is meant to heal finally in an unusual move cushman suggests a way to use interpretive methods in the everyday practice of psychotherapy by doing so he hopes to dissuade both patient and therapist from colluding with the empty self or the rampant consumerism of our time

betty cannon is the first to explore the implications of sartrean philosophy for the freudian psychoanalytic tradition drawing upon sartre s work as well as her own experiences as a practicing therapist she shows that sartre was a fellow traveler who appreciated freud s psychoanalytic achievements but rebelled against the determinism of his metatheory the mind sartre argued cannot be reduced to a collection of drives and structures nor is it enslaved to its past as freud s work suggested sartre advocated an existentialist psychoanalysis based on human freedom and the self s ability to reshape its own meaning and value through the sartrean approach cannon offers a resolution to the crisis in psychoanalytic metatheory created by the current emphasis on relational needs by comparing sartre with freud and influential post freudians like melanie klein otto kernber margaret mahler d w winnicott heinz kohut harry stack sullivan and jacques lacan she demonstrates why the sartrean model transcends the limitations of traditional freudian metatheory in the process she adds a new dimension to our understanding of sartre and his place in twentieth century philosophy

in this masterful and scholarly work barbara socor traces the development of the concept of self from its origins in freud s works through the british school the french school and up to

the current conceptualizations of the self the book is an education in the history and evolution of psychoanalytic thinking and it contains a clarity of thought about the elusive concept of the self that has been absent in the literature George Frank DSW

this book includes 39 papers presented at the international conference on client centered and experiential psychotherapy held in Chicago in May 2000 this international collection of papers spanning theory and practice across classical client centered to experiential psychotherapy offers a rich diversity of thinking and opinion
